

On the sunny morning of 8th Jun 2010, members from SSIA and IEEE SSCS gathered at Hotel Amara for breakfast talk by Prof. Willy Sansen. The topic is **“Challenges To The Design Of Integrated Systems In Future CMOS Technologies”** and Prof. Willy Sansen shared with the audience his insight on the future trend and challenges of IC design in CMOS technologies.

The breakfast talk received good feedback and the only complaint from the audience was that they didn't have enough time to ask more questions. Perhaps the only solution is to invite Prof Willy Sansen back again next year.

This breakfast talk is jointly organized by IEEE SSCS and Spyro Technology.

CEO Talk

“The Changing Dynamics of Global Outsource Model”

**CEO of Evans Analytical Group (EAG)
Mr Harry Davoody**

“Will Singapore continues to be successful for the next 20 years with the changing dynamics of global outsourcing model?” This was the question posted by Mr Harry Davoody on 15th Jun 2010 at the SSIA CEO Talk series at The Pines. Mr. Davoody's career spans three decades in diverse industries such as Semiconductor, Solid-State Lighting, Private Equity Investment, and Test Services. His talk outlined the recent outsourcing trends in market sectors that leverage technology and it ended well with a lively exchange between Mr Davoody and the audience.
