

M.I.D.A.S.

Singapore's Semiconductor Community

MIDAS benefits

By joining MIDAS Singapore, you become part of a Singapore-focused semiconductor community. Representing Singapore's semiconductor companies and the companies that support the semiconductor industry in Singapore, you gain business information and networking events to help you stay informed and connected. You also help MIDAS to facilitate a more vibrant and conducive growth environment for the IC & System design industry.

MIDAS's aim is to help your business flourish in Singapore and the region and to ensure your voice is heard through proactive advocacy.

MEMBERSHIP BENEFITS

- **Visibility:** Networking, individual and company visibility
- **Advocacy:** Collectively address Singapore semiconductor industry challenges
- **Shared-Knowledge:** Access to Singapore-focused market and industry data and surveys
- **Education and Capability:** Develop Singapore's semiconductor capability

Visibility and Leadership

MIDAS provides our members many visibility and leadership opportunities. Some of these include:

Leadership

Participation on the Executive Committee – MIDAS is structured to be a self managed, self funded, non profit organization, directed by the industry through its full members. Policy and government initiative coordination is accomplished via a 12 person Executive Committee.

MIDAS Speaking Opportunities – MIDAS hold industry events with speakers from its member companies and the industry at large. Member companies have the opportunity to speak at these events, providing visibility within the industry.

M.I.D.A.S.

Singapore's Semiconductor Community

Participation in MIDAS committees – MIDAS has 6 committees chartered with focused agendas to further advance the Singapore semiconductor industry. Members have the opportunity to participate and lead these committees. These committees are:

- **Market Development Committee:** Executes initiatives that grow the semiconductor market for Singapore-based semiconductor companies.
- **Supply Chain Committee:** Provides a platform for communication between the Singapore semiconductor companies and key suppliers, specifically foundry and back-end partners.
- **Industry Service Committee:** Organizes and executes value added services that will to promote communication among semiconductor companies and its stakeholders in Singapore
- **IC Design Committee:** Focuses on initiatives that further IC design competitiveness.
- **University Collaboration Committee:** Facilitates communication between universities and industry.
- **EDA Deployment Committee:** Coordinates design tool needs between EDA companies and IC design companies.

Visibility

MIDAS provides our members the opportunity to gain visibility for their company, brand, executives, employees, products and services. Some of the MIDAS visibility opportunities include:

Company Profile – The MIDAS website includes profiles of its member companies. Each month 2 companies are highlighted on the MIDAS home page to provide additional exposure to these companies and their areas of focus in Singapore.

Advertising and Sponsorships – Advertising through MIDAS and sponsoring MIDAS events provides valuable opportunities for companies to build their corporate brands within Singapore, establishing visibility with customers, potential employees, and suppliers. See the [MIDAS Sponsorship Guide](#) for more information.

Advocacy

MIDAS seeks to be the one consolidated voice for Singapore's semiconductor industry. As such MIDAS advocates common needs to EDB, MOM, universities and other Singapore regulatory and government organizations. Your membership helps focus resources on the common needs of our industry, directly benefiting your company.

M.I.D.A.S.

Singapore's Semiconductor Community

Examples have included manpower recruiting programs, training programs, university engineering programs and curriculum.

Shared Knowledge

Through our members-only login, members have access to data, surveys and resources.

MIDAS “Members-Only” section of the Web Site - Each member company is assigned a user name and password for company-wide access to member resources. This members only access provides access to a growing list of online resources focused on Singapore semiconductor companies and industry.

Industry Articles and Whitepapers – MIDAS provides access to previously published Singapore semiconductor focused information.

Singapore Semiconductor Careers – The MIDAS web site helps employers and interested candidates find each other through the MIDAS industry position listings.

Presentations - Presentations are available from the various events held by MIDAS.

Profile Directories - These directories provide are tools that provide members with focused information on the Singapore semiconductor industry including profiles of Singapore semiconductor companies and profiles of other suppliers in the Singapore semiconductor industry. Publications and Reports.

Education and Capability

MIDAS leads several initiatives that further the capability of Singapore semiconductor companies. These programs directly benefit member companies. The programs include:

MIDAS Mentorship Program: MIDAS Mentorship program is an initiative from MIDAS for the microelectronics students in Singapore. The objective of this program is to provide guidance/mentorship to the students with help from industry professionals. This in turn is aimed to help students understand better about this vibrant industry and facilitate them in their career path. See <http://www.midas.org.sg/mentoring.php> for more information.

MIDAS Recruiting Task Force: In conjunction with EDB (Economic Development Board) and MOM (Ministry of Manpower), MIDAS plans and executes recruitment of

M.I.D.A.S.

Singapore's Semiconductor Community

foreign talent into Singapore's semiconductor industry including talent fairs, recruiting material and guiding government programs.

MIDAS Seminars: Through the year MIDAS sponsors several seminars, talks and conferences focused on educating and increasing the capabilities of MIDAS member companies. These events include the annual Singapore Semiconductor Summit with leaders through our industry.
